2026/27

NEWS FROM HWK SKIWAX

We look back on a successful 2025/26 season.

In addition to waxing seminars and our waxing service at numerous popular cross-country ski races, HWK Skiwax was also in action at countless World Cup races in both Alpine and Nordic disciplines. This gives us very fast and honest feedback from service technicians at all times.

Alongside all of our field assignments, we also invested a great deal of time in product testing.

The results speak for themselves: we have further developed our top fluorfree racing line and taken it to the next level. Among the highlights are a new UHX Liquid Spray Newsnow Middle, six completely new UHX Powders, and much more.

These top products – just like us – are already waiting for the next winter. Look forward to the coming season and experience the development for yourself.

You can find all new products, the event calendar and much more at *www.skiwax.tirol*

WAX UP
WAX SIMPLE

Imagine a cloudless, bright blue sky above you. The first ray of sunlight bathes the mountains in golden light - and you are right in the middle of it. WAX UP feels exactly like that: a multitool that never lets you down, whatever the snow demands. Whether your skins are slow, your base is scratching, or you are thirsty after reaching the summit - WAX UP has everything you need:

SKIN WAX, so snow no longer builds up on your skins.

GLIDE WAX, makes your skis faster than you ever dreamed.

SCRAPER & POLISHING TOOL, for the perfect final finish.

AND YES – A BOTTLE OPENER because after the last turn you deserve a reward.

WAX UP fits in every trouser pocket, is as versatile as a Swiss Army knife, and gets you where you want to go. No more stuck skins or sluggish skis. WAX UP is your key to endless fun in the snow.

WAXUP Item no. WF77 **EUR 27,00**

ROTOR BRUSH HORSEHAIR **RB3-70** **€ 35,00**
70 mm
Rotor brush for brushing out waxes

ROTOR BRUSH TAMPICO **RB4-70** **€ 35,00**
70 mm
Rotor brush for brushing out waxes

ROTOR MERINO ROLLER **RB6-70** **€ 35,00**
70 mm
Merino roller for applying and polishing top-finish waxes

ROTOR CORK ROLLER **RB9-70** **€ 35,00**
70 mm
Cork roller for working waxes into the base

SHAFT WITH PROTECTIVE COVER
Holder for 140 mm rotor brushes with protective cover

Combination shaft with protective cover 140 mm **RB1-140** **€ 60,00**

More detailed information: see the QR codes in the original catalog

Alpine rotor brushes

Nordic rotor brushes

SMALL HAND BRUSHES

SMALL HAND BRUSH **8450** **€ 21,00**
HARD NYLON
Small hand brush for polishing waxes

SMALL HAND BRUSH **8450-3** **€ 21,00**
SOFT NYLON
Small hand brush for polishing liquid waxes

SMALL HAND BRUSH **8457** **€ 21,00**
HORSEHAIR
Small hand brush for brushing out finish products

SMALL HAND BRUSH **8454** **€ 26,00**
FINE BRONZE
Small hand brush for deep and precise brushing of the structure

SMALL HAND BRUSH **8456** **€ 26,00**
HARD BRONZE
Small hand brush for coarse exposure of the structure

SMALL HAND BRUSH **8459** **€ 44,00**
EXTRAFINE STEEL
Small hand brush for deep cleaning of the structure

LARGE OVAL HAND BRUSHES

LARGE HAND BRUSH **8450-1** **€ 32,00**
HARD NYLON
Large hand brush for polishing waxes

LARGE HAND BRUSH **8450-2** **€ 32,00**
SOFT NYLON
Large hand brush for polishing liquid waxes

LARGE HAND BRUSH **8454-2** **€ 47,00**
FINE BRONZE
Large hand brush for deep and precise brushing of the structure

LARGE HAND BRUSH **8454-3** **€ 52,00**
HARD BRONZE
Large hand brush for coarse exposure of the structure

LARGE HAND BRUSH **8459-1** **€ 52,00**
ANGLED STEEL
Large hand brush for coarse preliminary work – angled arrangement makes it less aggressive

LARGE HAND BRUSH **8459-2** **€ 52,00**
STRAIGHT STEEL
Large hand brush for coarse preliminary work – very aggressive

ACCESSORIES

NORDIC GROOVE PIN 8105 € 21,00
For removing wax from the center groove of cross-country skis and jumping skis

PLEXI SCRAPER
Plexi scraper for removing wax

3 mm	**8460**	**€ 4,20**
5 mm	**8461**	**€ 5,20**

HWK SCRAPER SHARPENER KS-N € 30,00
Plexi scraper sharpener with file

PROFESSIONAL SCRAPER SHARPENING DEVICE KS-P €230,00
Electric plexi scraper sharpener with milling cutter

NATURAL CORK & FLEECE BLOCK 8512-1 € 10,00
Cork and fleece block for processing top-finish products

POLISHING & CLEANING CLOTHS 25 PCS. 823-S25 € 18,00
Microfiber cloths suitable for cleaning and polishing skis

PROFI-WAXER (WAXING MACHINE) 8520 € 250,00
For fast and economical application of waxes

Replacement tray, empty	**8521**	**€ 30,00**
Silicone roller	**8522**	**€ 35,00**
Aluminum roller	**8523**	**€ 27,00**
Complete replacement tray	**8524**	**€ 85,00**

BASE CLEANER
Gentle base cleaner - for dirt and grip wax

250 ml	**8111-2**	**€ 16,00**
1000 ml	**8111**	**€ 48,00**

FLUOR CLEANER
Cleaner for removing fluor residues

250 ml	**8111-3**	**€ 21,00**
1000 ml	**8111-FL**	**€ 63,00**

POWER CLEANER
Cleaner for removing fluorfree racing waxes

250 ml	**PC-250**	**€ 21,00**
1000 ml	**PC-1000**	**€ 63,00**

POWER CLEANING WIPES **PC-W80** **€ 24,00**
80 cleaning wipes for base, skin, surfaces, tools and hands

HWK WAXIRON **WI1** **€ 200,00**
- Precise temperature control from 90°C to 180°C on a digital touch display
- ergonomic cork handle
- beveled 15 mm plate for easier ironing
- extra-long 2.5 m power cable

HWK WAXIRON SMART **WI2** **€ 150,00**
- Precise manual temperature control from 90°C to 160°C
- heats quickly and is easy to use
- ergonomic cork handle
- **180 g Racing Wax FREE**

HWK WAXIRON SMALL **WI3** **€ 90,00**
- Manual temperature control from 60°C to 180°C
- entry-level model
- ideal for processing iron-on waxes and achieving even distribution on ski or snowboard bases

CARE LINE

So that not only your skis are well cared for before the next adventure, but you are also ready for your outdoor activities, we offer the right care products for your sportswear and accessories.

Water Shield Spray **C100** **€ 13,20**
250 ml
Water-repellent impregnation for outdoor sports clothing and shoes with a beading effect

Eco Refresh Spray **C200** **€ 13,20**
150 ml
Biodegradable freshening spray for helmets, gloves and shoes

Eco Textile Cleaner **C300** **€ 13,20**
250 ml
Ecological detergent, specially formulated for functional sports-wear and other high-quality textiles - biodegradable

APPLICATION INSTRUCTIONS

BASE CLEANING

Cleaning with base cleaner
(for dirty or ground skis)
- Apply base cleaner to a cloth and clean the base
- While the base is still wet, brush it with a metal brush
- After brushing, wipe the base with a clean cloth
- The ski can now be waxed

Cleaning with fluor cleaner or Power Cleaner
(removing old racing waxes)
- Apply cleaner to a cloth and clean the base
- Brush the wet base with a fine steel brush to loosen wax residues
- After brushing, wipe the base with a cloth and allow it to dry for at least five minutes
- The ski can now be waxed

IRON-ON WAXES

- Apply wax to the clean base
- Iron 2-3 times in the direction of travel at the specified iron temperature
- Allow the wax to cool, then scrape it off with a plexi scraper
- Brush out the base and expose the structure
- Finish by polishing the base with a nylon brush

LIQUID WAXES

- Spray wax onto the base
- Allow the wax to dry
- Finish by polishing the base with a nylon brush or merino wool

FLUORFREE UHX BLOCKS

- Apply wax to merino wool
- Polish twice in the direction of travel using the waxed wool
- Then polish with clean merino wool

PASTES

- Apply wax evenly to the ski base
- Allow it to dry
- Finish by brushing out with a fine bronze brush and polishing with a nylon brush

STICKS

Ironing
- Rub the wax onto the clean base
- Iron 2-3 times in the direction of travel at the specified iron temperature
- Work the wax in with hand fleece or rotor fleece
- Allow the wax to cool, then scrape it off with a plexi scraper
- Brush out the base and expose the structure
- Finish by polishing the base with a nylon brush

Corking
- Rub the wax onto the clean base
- Work the wax in with hand fleece or rotor fleece
- Brush out the base and expose the structure
- Finish by polishing the base with a nylon brush

POWDER

Fluorfree
- Sprinkle wax onto the clean base
- Iron 2-3 times in the direction of travel at the specified iron temperature
- Allow the wax to cool, then scrape it off with a plexi scraper
- Brush out the base and expose the structure
- Finish by polishing the base with a nylon brush

Fluor powder
- Sprinkle wax onto the clean base
- Iron twice in the direction of travel at the specified iron temperature
- Work the wax in with hand fleece or rotor fleece
- Allow the wax to cool, then scrape it off with a plexi scraper
- Brush out the base and expose the structure
- Finish by polishing the base with a nylon brush

SKIN WAXES

Block waxes
- Rub the wax onto the skin in the direction of travel
- For longer durability, briefly iron it (at the specified iron temperature, without pressure, melting it lightly on the surface)
- Repeat the process for even longer durability (maximum 2-3 times)

Speedsticks
- Rub the wax onto the base-waxed skin
- For longer durability, briefly iron it (at the specified iron temperature, without pressure, melting it lightly on the surface)

PRODUCT INFORMATION & SNOW SCIENCE

For a clearer overview, our wax labels are divided by color:

WARM	MIDDLE	COLD	ALLROUND
for wet snow types	for moist snow types	for dry snow types	for all snow types

NEW SNOW

Snow types that are no more than 24 hours old. Depending on temperature, conditions can range from very cold/powdery (blue waxes), through sticky “marble” snow (red waxes), to very wet snow (yellow waxes).

ALTERED/ TRANSFORMED SNOW

Snow types that are more than 24 hours old. In dry, cold air, snow loses moisture and crunches underfoot (blue waxes). In the middle temperature range, the snow crystal begins to thaw and loses its sharp edges. Through repeated thawing and freezing, the snow becomes increasingly compact and hard (red waxes).

FIRN AND OLD SNOW

This snow has lost its original crystalline shape and resembles frozen ice grains. It can therefore be classified as fine-, medium- or coarse-grained. In cold temperatures, blue wax is used regardless of grain size. As temperatures rise, the surface begins to thaw and becomes moist (red waxes). In warm conditions, it turns into wet slushy snow (yellow waxes).

ARTIFICIAL SNOW

Artificial snow does not have a crystal shape; it resembles small ice platelets that are very compact and hard. As a general rule, choose wax one step colder for artificial snow.

SALTED SNOW

Salt removes water from soft, wet snow within a short time and hardens it quickly despite high temperatures. The indicated temperature ranges refer to snow temperature up to the freezing point. If the range printed on the packaging extends above 0°C, air temperature is used as the reference value.

SAFETY INFORMATION & TERMS AND CONDITIONS

HWK ski waxes must not be swallowed and must be kept out of reach of small children. The maximum processing temperature must not exceed 200°C. The crystals that may look like “fumes” when ironing fluor waxes can irritate the respiratory tract; therefore, wear respiratory protection. In general, respiratory masks are recommended for all waxing work - especially when using rotor brushes - because fine fluor dust and wax particles can irritate the airways.

Fluorinated waxes (including fluor klisters and fluor dry waxes) must never be heated with equipment that uses an open flame. Smoking is prohibited while processing fluorinated waxes. This smoking ban must be strictly observed. Only process HWK ski waxes in well-ventilated rooms.

SUMMARY OF SAFETY INFORMATION

- Do not heat wax above 200°C.
- Do not smoke during processing.
- Open flames are prohibited during processing.
- Wear a protective mask and ventilate the room well.
- Do not swallow wax.
- Do not allow wax to come into contact with the eyes.

WAXING SEMINARS

HWK Skiwax offers waxing courses for companies, clubs and private individuals.

We also employ trainers and waxing technicians who work in the World Cup. To help us plan dates, please book as early as possible. Course fees as well as travel and accommodation expenses for the presenter are agreed individually.

Registration: info@hwk-skiwax.com or +43 5373 42420.

ORDERING AND SHIPPING OF HWK PRODUCTS

HWK products can be ordered directly (on site, by phone or by email) or via the online shop. Deliveries are generally made against advance payment or credit-card payment. Exceptions are at the discretion of management.

Orders of € 120 or more are shipped free of postage and packaging charges within Austria and Germany. For orders below € 120, a contribution of € 7 is charged for postage and packaging. Special rules apply to international deliveries.

Orders over € 1,000 receive a 5% discount.

Orders are generally dispatched on the day they are placed. Prices include statutory VAT. No liability is accepted for printing errors. Prices are subject to change.

CHAIN COATING

CHAIN COATING

Imagine gliding not only elegantly down the slopes, but also effortlessly along roads and trails on your bike. Thanks to our proven expertise in ski wax, which we have now transferred to the cycling world, that is exactly what becomes possible.

Our HWK Chain Coating range is your new best friend when it comes to caring for your bicycle chain. Whether you prefer liquid wax or the hot-wax method, we have the right product for you. With our expertise, we ensure that your chain not only runs smoothly, but is also optimally protected.

CHAIN COATING **CCL-30** **€ 20,00**
30 ml

HWK CHAIN COATING LIQUO is a solvent-free, inorganic lubricant and is more than 80% biodegradable. It provides long-lasting, clean chain lubrication with less wear and contamination. Unlike oily products, it forms a dry lubricating film to which hardly any dirt sticks.

CHAIN COATING CLEANER
For a clean chain in just a few minutes

250 ml **CC-250** **€ 16,00**
1.000 ml **CC-1000** **€ 48,00**

With our bicycle chain cleaner, you can get your chain sparkling clean again in no time - quickly, thoroughly and with minimal effort. The complete set contains everything you need for effective cleaning:

- **Highly effective chain cleaner** – removes even stubborn dirt, oil and deposits.
- **Practical cleaning container** – perfect for soaking the chain in the cleaner for thorough and effective cleaning.

POLISHING & CLEANING CLOTHS **8323-C25** **€ 18,00**
25 PCS.
For cleaning and polishing bicycle frames and chains

CHAIN COATING HOTWAX SET **CCWS-500** **€160,00**
Hotwaxing your bicycle chain – with our HWK CHAIN COATING HOTWAX and accessories for maximum performance!

Set includes:
- Hotwax pot incl. heating plate
- 2 metal loops
- Hanging device
- 500 g Hotwax

CHAIN COATING HOTWAX Base
Hot waxing is the most effective method for extending the life of your bicycle chain and maximizing its performance. Our high-quality chain wax provides long-lasting lubrication that protects against dirt and moisture. Thanks to the special wax coating, your chain stays clean and runs efficiently.

130 g **CCW-130** **€ 16,00**
500 g **CCW-500** **€ 40,00**

CHAIN COATING HOTWAX Race **CCWR-130** **€ 35,00**
130 g

CHAIN COATING HOTWAX RACE was developed specifically for racing and gives you the decisive advantage on race day. The high-performance chain wax coating reduces friction to a minimum – for noticeable watt savings and maximum performance. By using different mixing ratios, you can tailor the wax perfectly to your requirements, whether for daily training or race day.

CHAIN COATING ADDITIVE HEAT SHIELD **CCA-HS24** **€ 29,00**
24 g

The additive is simply melted together with your HWK CHAIN COATING HOTWAX in the form of a practical “additive disc”. It stabilizes the waxes so that your bicycle chain retains its optimum properties even at extreme temperatures.

CHAIN COATING BIKE POLISH **CCBP-100** **€ 19,00**
100 ml
High-quality polish for caring for and refreshing bicycle frames.

CHAIN COATING GEAR COATING **CCGC-90** **€ 24,00**
90 ml
Spray coating for protecting bicycle cassettes, sprockets and gears.

CHAIN COATING HOTWAX

BENEFITS OF HOT WAXING WITH OUR CHAIN WAX

- **Long-lasting lubrication:**
  less frequent re-lubrication is necessary
- **Minimal dirt adhesion:**
  wax does not attract dirt like conventional oils
- **Reduced wear:**
  your chain stays in top condition and runs more quietly
- **Reliable performance in all weather:**
  rain or shine, your chain remains optimally protected

HOW IT WORKS:

1. **Clean the chain:**
   Use a chain cleaner and degreaser to remove old lubricants and dirt completely. A clean chain is essential for effective wax treatment.
2. **Prepare the wax bath:**
   Heat our HWK CHAIN COATING HOTWAX in the wax pot to 80-90°C (setting 1-2). This makes the wax fully liquid so it can penetrate deep into the chain.
3. **Immerse the chain:**
   Thread the chain onto the supplied metal loop and immerse it in the melted wax. Leave the chain in the wax bath for 10-15 minutes so every gap is evenly coated.
4. **Let excess wax drip off:**
   Remove the chain from the wax bath and hang it over the pot so excess wax can drain away. Then gently wipe off remaining excess wax with a cloth to leave an even protective coating.
5. **Reinstall and test the chain:**
   Refit the chain to your bike and test it. Thanks to hot waxing, your chain will now run more quietly and smoothly and remain protected for longer.
